## SUMMARY

---

I bring the capacity and willingness to dive into new material. I thrive in a team oriented environment and look to surround myself with passionate and driven team members. Finding small bits of simplicity in a difficult task is how I approach my code, and I aim to apply this to all aspects of my work.

## SKILLS

---

**Frontend:** Javascript(ES6), React, CSS, HTML, Bootstrap, Materialize

**Backend:** Postgres(PSQL), MongoDB, Mongoose, EJS, Express, AXIOS, Node

**Utilities:** Git/Version Control, RESTful API, JSON, Postman

## PROJECTS

---

### COMPLe

A Image processing application which inspects photos and recommends complimentary colors.

- Administered the Cloudinary and React-Vis API for photo upload and color data visualization.
- Implemented Express-Jwt authorization for user authentication.
- Utilized CSS for concise mobile and desktop optimization.

### Stackd

A hub to keep you up to date on the latest tech trends, programing languages, and developer school options.

- Applied News API to integrate tech news articles from 3 different platforms across the world.
- Implemented Express-Jwt authorization for user authentication and profile customization.
- Utilized Bootstrap-React styling for a clean and elegant aesthetic.
